# 1. System Overview

PRIVITY is a comprehensive Private Equity Share Booking System designed for SMIFS. It manages the entire lifecycle of share bookings, from client onboarding to payment settlement, including support for Referral Partners, inventory management, and financial reporting.

## ***Key Features:***

- Client & Vendor Management with document verification
- Stock/Security Master with corporate actions tracking
- Multi-level booking approval workflow
- Referral Partner (RP) commission system with bank details
- Real-time notifications via WebSocket
- Financial reporting with Excel/PDF exports
- Email audit logging for compliance
- Microsoft Azure AD Single Sign-On
- Role-based access control (7 user roles)

## 2. Technology Stack

Layer	Technology	Version
Frontend Framework	React	19.0.0
UI Components	Shadcn/UI (Radix)	Latest
Styling	Tailwind CSS	3.x
Backend Framework	FastAPI	0.110.1
ASGI Server	Uvicorn	0.25.0
Database	MongoDB	6.x
DB Driver	Motor (async)	3.3.1
Authentication	JWT + MSAL	PyJWT 2.10.1
Real-time	WebSockets	15.0.1

### 3. Backend Architecture

The backend follows a modular architecture with 18 specialized routers, each handling a specific domain of the application.

#### Directory Structure:

```
/app/backend/
■■■■ server.py # Main FastAPI entry point
■■■■ config.py # Configuration & constants
■■■■ database.py # MongoDB connection + indexes
■■■■ models/__init__.py # Pydantic data models
■■■■ utils/auth.py # JWT utilities
■■■■ services/ # Business logic services
■ ■■■■ email_service.py # Email + audit logging
■ ■■■■ notification_service.py
■ ■■■■ ocr_service.py # Document OCR
■ ■■■■ audit_service.py
■ ■■■■ inventory_service.py
■ ■■■■ azure_sso_service.py
■■■■ routers/ # API endpoint modules (18 routers)
```

#### Router Modules:

Router	Prefix	Description
auth.py	/auth	Login, register, SSO, password management
analytics.py	/analytics	Performance metrics & summaries
audit_logs.py	/audit-logs	Activity audit trail
bookings.py	/bookings	Booking CRUD with approval workflow
clients.py	/clients	Client & document management
dashboard.py	/dashboard	Dashboard statistics
email_logs.py	/email-logs	Email audit logging
email_templates.py	/email-templates	Email template management
finance.py	/finance	Payments, refunds, RP commissions
inventory.py	/inventory	Stock inventory management
notifications.py	/notifications	Real-time alerts
purchases.py	/purchases	Purchase order management
referral_partners.py	/referral-partners	RP management
reports.py	/reports	P&L reports, exports
smtp_config.py	/smtp-config	SMTP configuration
stocks.py	/stocks	Stock/security master
users.py	/users	User management
database_backup.py	/backup	Database backup/restore

## 4. Frontend Architecture

The frontend is built with React 19 and uses Shadcn/UI components based on Radix primitives. It follows a page-based structure with shared context providers for theme and notifications.

*Key Frontend Dependencies:*

Package	Purpose
react / react-dom	UI Framework (v19)
react-router-dom	Client-side routing
axios	HTTP client for API calls
@radix-ui/*	Shadcn UI primitives
tailwindcss	Utility-first CSS
lucide-react	Icon library
recharts	Charts and graphs
sonner	Toast notifications
@azure/msal-react	Microsoft SSO
date-fns	Date utilities
zod	Schema validation

## 5. Database Schema

MongoDB is used as the primary database. Below are the main collections and their purposes.

Collection	Description	Key Fields
users	User accounts	id, email, name, pan_number, role
clients	Clients & Vendors	id, name, pan_number, otc_ucc, is_vendor
stocks	Stock/Security master	id, symbol, name, isin_number, face_value
bookings	Share bookings	id, booking_number, client_id, stock_id, quantity, status
purchases	Purchase orders	id, po_number, vendor_id, stock_id, quantity
inventory	Stock inventory	id, stock_id, available_qty, total_value
referral_partners	RP records	id, rp_code, name, pan_number, bank_details
rp_payments	RP commissions	id, booking_id, rp_id, amount, status
employee_commissions	Employee share	id, booking_id, employee_id, amount
refund_requests	Client refunds	id, booking_id, amount, status
notifications	Real-time alerts	id, user_id, message, read, created_at
audit_logs	Activity trail	id, action, entity_type, user_id, created_at
email_logs	Email history	id, to_email, subject, status, template_key
email_templates	Email templates	key, subject, body, is_active
email_config	SMTP settings	smtp_host, smtp_port, smtp_username

## 6. User Roles & Permissions

Role ID	Name	Access Level
1	PE Desk	Super Admin - Full system access
2	PE Manager	Admin - Most features except system config
3	Compliance	Compliance oversight and approvals
4	Employee	Create bookings, clients, RPs
5	Viewer	Read-only access
6	Client	External - Booking confirmation only
7	Finance	Finance dashboard, payments, refunds

## 7. API Documentation

Base URL: All endpoints are prefixed with /api

Authentication: Bearer token (JWT) in Authorization header

Content-Type: application/json

### 7.1 Bookings

Method	Endpoint	Description
GET	/api/bookings/check-client-rp-conflict/{client_id}	Check Client Rp Conflict
POST	/api/bookings	Create Booking
GET	/api/bookings	Get Bookings
PUT	/api/bookings/{booking_id}/approve	Approve Booking
PUT	/api/bookings/{booking_id}/void	Void Booking
GET	/api/bookings/{booking_id}	Get Booking

### 7.2 Clients

Method	Endpoint	Description
POST	/api/clients	Create Client
GET	/api/clients	Get Clients
GET	/api/clients/pending-approval	Get Pending Clients
GET	/api/clients/{client_id}	Get Client
PUT	/api/clients/{client_id}	Update Client
DELETE	/api/clients/{client_id}	Delete Client
PUT	/api/clients/{client_id}/approve	Approve Client
PUT	/api/clients/{client_id}/suspend	Suspend Client
PUT	/api/clients/{client_id}/unsuspend	Unsuspend Client

### 7.3 Database Management

Method	Endpoint	Description
GET	/api/database/backups	List Backups
POST	/api/database/backups	Create Backup
GET	/api/database/backups/{backup_id}	Get Backup Details
DELETE	/api/database/backups/{backup_id}	Delete Backup
POST	/api/database/restore	Restore Database
GET	/api/database/stats	Get Database Stats
DELETE	/api/database/clear	Clear Database
GET	/api/database/backups/{backup_id}/download	Download Backup
POST	/api/database/restore-from-file	Restore From File

## 7.4 Email Logs

Method	Endpoint	Description
GET	/api/email-logs	Get Email Logs
GET	/api/email-logs/stats	Get Email Log Stats
GET	/api/email-logs/{log_id}	Get Email Log Detail
GET	/api/email-logs/by-entity/{entity_type}/{entity_id}	Get Emails By Entity
DELETE	/api/email-logs/cleanup	Cleanup Old Email Logs

## 7.5 Finance

Method	Endpoint	Description
GET	/api/finance/payments	Get All Payments
GET	/api/finance/summary	Get Finance Summary
GET	/api/finance/rp-payments	Get Rp Payments
GET	/api/finance/rp-payments/summary	Get Rp Payments Summary
PUT	/api/finance/rp-payments/{payment_id}	Update Rp Payment
GET	/api/finance/employee-commissions	Get Employee Commissions
GET	/api/finance/employee-commissions/summary	Get Employee Commissions Summary
PUT	/api/finance/employee-commissions/{booking_id}/mark-paid	Mark Commission Paid

## 7.6 Other

Method	Endpoint	Description
PUT	/api/bookings/{booking_id}	Update Booking
DELETE	/api/bookings/{booking_id}	Delete Booking
POST	/api/clients/{client_id}/bank-account	Add Bank Account
PUT	/api/clients/{client_id}/employee-mapping	Update Client Employee Mapping
GET	/api/finance/refund-requests	Get Refund Requests
GET	/api/finance/refund-requests/{request_id}	Get Refund Request
PUT	/api/finance/refund-requests/{request_id}	Update Refund Request
PUT	/api/finance/refund-requests/{request_id}/update-bank-details	Update Refund Bank Details
GET	/api/finance/export/excel	Export Finance Excel
GET	/api/email-templates	Get Email Templates
GET	/api/email-templates/{template_key}	Get Email Template
PUT	/api/email-templates/{template_key}	Update Email Template
POST	/api/email-templates/{template_key}/reset	Reset Email Template
POST	/api/email-templates/{template_key}/preview	Preview Email Template
POST	/api/stocks	Create Stock
GET	/api/stocks	Get Stocks
GET	/api/stocks/{stock_id}	Get Stock

PUT	/api/stocks/{stock_id}	Update Stock
DELETE	/api/stocks/{stock_id}	Delete Stock
POST	/api/stocks/bulk-upload	Bulk Upload Stocks
GET	/api/inventory	Get Inventory
GET	/api/inventory/{stock_id}	Get Stock Inventory
DELETE	/api/inventory/{stock_id}	Delete Inventory
POST	/api/corporate-actions	Create Corporate Action
GET	/api/corporate-actions	Get Corporate Actions
DELETE	/api/corporate-actions/{action_id}	Delete Corporate Action
GET	/api/users	Get Users
PUT	/api/users/{user_id}/role	Update User Role
GET	/api/analytics/summary	Get Analytics Summary
GET	/api/analytics/stock-performance	Get Stock Performance
GET	/api/analytics/employee-performance	Get Employee Performance
GET	/api/analytics/sector-distribution	Get Sector Distribution
GET	/api/analytics/daily-trend	Get Daily Trend
GET	/api/audit-logs	Get Audit Logs
GET	/api/audit-logs/stats	Get Audit Stats
GET	/api/dashboard/stats	Get Dashboard Stats
GET	/api/dashboard/analytics	Get Dashboard Analytics
POST	/api/purchases	Create Purchase
GET	/api/purchases	Get Purchases
GET	/api/purchases/{purchase_id}/payments	Get Purchase Payments
POST	/api/purchases/{purchase_id}/payments	Add Purchase Payment
DELETE	/api/purchases/{purchase_id}	Delete Purchase
GET	/api/reports/pnl	Get Pnl Report
GET	/api/reports/export/excel	Export Excel
GET	/api/reports/export/pdf	Export Pdf
POST	/api/auth/register	Register
POST	/api/auth/login	Login
GET	/api/auth/me	Get Me
POST	/api/auth/change-password	Change Password
GET	/api/auth/sso/config	Get Sso Config
POST	/api/auth/sso/login	Sso Login
POST	/api/auth/forgot-password	Forgot Password
POST	/api/auth/reset-password	Reset Password
POST	/api/clients/{client_id}/documents	Upload Client Document
GET	/api/clients/{client_id}/documents/{filename}	Download Client Document
POST	/api/ocr/preview	Ocr Preview

GET	/api/clients/{client_id}/documents/{file_name}	Get Document Ocr
GET	/api/employees	Get Employees
POST	/api/clients/bulk-upload	Bulk Upload Clients
POST	/api/clients/{client_id}/clone	Clone Client Vendor
PUT	/api/corporate-actions/{action_id}/apply	Apply Corporate Action
GET	/api/booking-confirm/{booking_id}/{token}/	Client Confirm Booking Get
POST	/api/booking-confirm/{booking_id}/{token}/	Client Confirm Booking Post
PUT	/api/bookings/{booking_id}/approve-loss	Approve Loss Booking
GET	/api/bookings/pending-loss-approval	Get Pending Loss Bookings
GET	/api/bookings/pending-approval	Get Pending Bookings
GET	/api/bookings-export	Export Bookings
POST	/api/bookings/{booking_id}/payments	Add Payment Tranche
GET	/api/bookings/{booking_id}/payments	Get Booking Payments
POST	/api/bookings/{booking_id}/insider-form	Upload Insider Form
GET	/api/bookings/{booking_id}/insider-form	Download Insider Form
DELETE	/api/bookings/{booking_id}/payments/{tranche_id}	Delete Payment Tranche
GET	/api/dp-transfer-report	Get Dp Transfer Report
GET	/api/dp-transfer-report/export	Export Dp Transfer Report
PUT	/api/bookings/{booking_id}/confirm-transfer	Confirm Stock Transfer
POST	/api/bookings/bulk-upload	Bulk Upload Bookings
GET	/api/clients/{client_id}/portfolio	Get Client Portfolio
GET	/api/notifications	Get Notifications
GET	/api/notifications/unread-count	Get Unread Count
PUT	/api/notifications/{notification_id}/read	Mark Notification Read
PUT	/api/notifications/read-all	Mark All Notifications Read
POST	/api/payments/upload-proof	Upload Payment Proof

## 7.7 Referral Partners

Method	Endpoint	Description
POST	/api/referral-partners	Create Referral Partner
GET	/api/referral-partners	Get Referral Partners
GET	/api/referral-partners/{rp_id}	Get Referral Partner
PUT	/api/referral-partners/{rp_id}	Update Referral Partner
POST	/api/referral-partners/{rp_id}/documents	Upload Rp Documents
PUT	/api/referral-partners/{rp_id}/toggle-active	Toggle Rp Active
GET	/api/referral-partners/{rp_id}/bookings	Get Rp Bookings
GET	/api/referral-partners-pending	Get Pending Referral Partners
GET	/api/referral-partners-approved	Get Approved Referral Partners
PUT	/api/referral-partners/{rp_id}/approve	Approve Referral Partner

## 7.8 Reports

Method	Endpoint	Description
GET	/api/reports/client-portfolio/{client_id}	Get Client Portfolio

## 7.9 SMTP Configuration

Method	Endpoint	Description
GET	/api/smtp-config	Get Smtplib Config
PUT	/api/smtp-config	Update Smtplib Config
POST	/api/smtp-config/test	Test Smtplib Connection
GET	/api/smtp-config/presets	Get Smtplib Presets

## 7.10 Users

Method	Endpoint	Description
POST	/api/users	Create User
PUT	/api/users/{user_id}	Update User
DELETE	/api/users/{user_id}	Delete User
POST	/api/users/{user_id}/reset-password	Reset User Password
GET	/api/users/hierarchy	Get User Hierarchy
PUT	/api/users/{user_id}/assign-manager	Assign Manager
GET	/api/users/{user_id}/subordinates	Get Subordinates
GET	/api/users/managers-list	Get Managers List

## 8. Third-Party Integrations

Service	Status	Purpose	Configuration
OpenAI (Emergent Key)	Active	Document OCR	Uses Emergent LLM Key
Microsoft Azure AD	Ready	SSO Login	Requires AZURE_TENANT_ID, AZURE_CLIENT_ID
SMTP Email	Configurable	Email notifications	Configurable via UI
Stripe	Available	Payment processing	API key in environment

## 9. Security Features

- JWT-based authentication with configurable expiry
- Password hashing using bcrypt
- Role-based access control (RBAC) with 7 permission levels
- Microsoft Azure AD Single Sign-On support
- OTP-based password reset with rate limiting
- PAN number validation and uniqueness enforcement
- Entity separation rules (Client ≠ RP ≠ Employee)
- Comprehensive audit logging for all actions
- Email audit trail for compliance
- CORS configuration for API security
- Input validation using Pydantic models
